Subject: Letter of Reference for the UK AID and DAI funded project titled "Evidence Generation and Advocacy for Institutionalization of School Health Programme in the Punjab Province"

Dear Dr. Roomi Aziz,

This letter acknowledges that NUR Center for Research and Policy (NCRP) at NUR Foundation has successfully completed the project titled "Evidence Generation and Advocacy for Institutionalization of School Health Programme in the Punjab Province" awarded under the Ilm Ideas Program in Pakistan funded by UK AID and managed by DAI.

We are excited that this innovative research and advocacy project was able to make a mark within the provincial policy landscape and appreciate the efforts of the project team at NCRP for effectively lobbying for the inclusion of 'School Health Programme' in the provincial Nutrition Policy. Efforts made through this project and its research, have contributed to; building key momentum around ensuring that school health is seen as a vital child's right issue, advocating for improved child health and nutrition within schools at key platforms with numerous stakeholders, and successfully engaging youth as an active participant in this discourse.

It is hoped that NCRP will continue to make the same effort to lobby for this agenda further and ensure sustainability of the intervention(s) designed under this innovative project with the support of Ilm Ideas, beyond the life of the project.

It has been a pleasure working with the NCRP team. I wish them luck with all their future endeavours to carry this work forward.

Best regards

Fiza Waheed
